This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

- 1. (Original) A method for producing perovskite particles of the formula ABO₃, wherein A is a metal of lower valency or a mixture of metals of lower valency and B is a metal of high valency or a mixture of metals of higher valency, characterized by the steps
 - (a) dissolution of the first metal or of the mixture of metals A in an anhydrous solvent or solvent mixture and
 - (b) reaction of the solution from (a) with an alkoxide of the second metal or of the mixture of metals B of the formula B(OR)_x and/or B(OR)_{x-2}, wherein x is the valency of the metal B and R is a linear or branched alkyl radical having 1 to 30 carbon atoms.
- 2. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein the metal A is selected from the group consisting of alkali metals, alkaline earth metals and transition elements.
- 3. (Original) The method as claimed in claim 2, wherein the metal A is selected from the group consisting of the monovalent or divalent metals.
- 4. (Original) The method as claimed in claim 3, wherein the metal A is selected from the group consisting of strontium and barium.
- 5. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein the metal B is selected from the group consisting of transition elements and metals of groups III and IV.
- 6. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein the metal B is selected from the group consisting of the tetravalent or pentavalent metals.
- 7. (Original) The method as claimed in claim 6, wherein the metal B is titanium.
- 8. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein the solvent is selected from alcohols, ketones, aldehydes and mixtures thereof.
- 9. (Original) The method as claimed in claim 8, wherein an alcohol or a mixture of an alcohol with a ketone and/or aldehyde is used as the solvent.
- 10. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein the alcohol is sterically stabilizing alcohol.

-2-

DOCKET NO.: WEICKM-0055

- 11. (Original) The method as claimed in claim 10, wherein the alcohol is benzyl alcohol.
- 12. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein the metal alkoxide in step (b) is titanium isopropoxide.
- 13. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein step (b) is carried out at a temperature of from 190 to 220°C.
- 14. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein, in step (b), a 10-100-fold excess of the solvent is present.
- 15. (Currently Amended) The method as claimed in any of the preceding claims Claim 1, wherein the perovskite particles obtained after step (b) have a mean size of 5-10 nm.
